

2007 Alicia 2 Years Old

Alicia Paintings (Art Class)

Dear Ms. Willow:

At the age of two years old, my daughter, Alicia, came to Sunshine Montessori for preschool. At that time she was the youngest in her whole class. She was very lucky to have teachers, Ms. B and Ms. Anna. They took great care for her and helped her to adapt very quickly to school life at Sunshine Montessori. In a short period of time she made many friends that she often talked about. Throughout her several months there she made a huge progress in not only her speech but also her writing skills. Her name was among the first things that she was able to write.

The school also provided a wide variety of classes for her to take and Alicia enjoyed many of them that I signed her up for. Out of the many classes available she took, their drawing classes, dancing classes, and gymnastic classes. She learned a great deal and after a few classes the art she brought back home was amazing. Not to mention, she also began dancing around a great deal afterwards. At home whenever music began playing, she started to make up dances with the moves learned at school. Hot lunch is also provided at the school. It is healthy and very convenient for parents. The staff there was also very dedicated, professional, and responsible.

Now Alicia lives overseas and still remembers her teachers and friends. If she comes back she will definitely be returning to Sunshine Montessori. I would highly recommend this school for other families with young children looking for a responsible staff and an excellent learning environment.

Sincerely,

Janice W. Chen
